

# About Our Gold

To have the ability to include physical gold as part of each NFT in our 999 Fine Art Collection and the ability to offer our art and gold NFTs at the best possible price, we contacted a long producing, prolific gold mine operator in the State of Nevada, in the USA. Their mine has millions of ounces of gold in the ground and they are extracting gold on a daily basis.

**The Mine where Unique Art Concepts  
acquired its GOLD that it uses to attach to  
the NFTs it mints**

Together, we developed a solution that allowed us to secure the gold we sought at an exceptional price by agreeing to a custom, irrevocable, guaranteed forward delivery contract. Based on this solution, we purchased the 13,300 troy ounces of gold we need for our NFTs on an initial, non-segregated, in the ground basis together with the guarantee of timely future physical delivery of fine gold bars by the mine operator to us or our order in exchange for the gold in the ground we acquired and we or assignees own until then.

It is by purchasing the gold in the ground and receiving title for this gold now while accepting delivery in the future as part of the purchase agreement, we were able to obtain the price per troy ounce for this gold that allows us to sell our art and gold 999 Fine Art Collection NFTs at an exceptional price. We

believe our hybrid 999 Fine Art Collection NFTs provide extraordinary value and a real opportunity to our customers.

While security concerns prevent us from publicizing the mine's exact name and location on the internet, verified 999 Fine Art Collection NFT owners can request this information using our website [CONTACT](#) page.

For those interested, we have on file a sworn statement made by the CEO of the company that operates the mine made under penalty of perjury if inaccurate. This sworn statement confirms Unique Art Concepts ownership of the gold we use when minting 999 Fine Art Collection NFTs and further confirms that the gold bar resulting from redemption of each 999 Fine Art Collection NFT will be unconditionally delivered to the NFT owner upon requested redemption as described and confirmed in our [Terms of Purchase](#) and on our [NFTMINE.NET](#) Marketplace website. To view this sworn statement, registered users of our marketplace website may request a private link for this purpose using our live chat icon located at the bottom right side of this page.
